

Project Update & Additional Billing for Out-of-Scope Features

Department Module

- **Department Dashboard:** Real-time analytics and a "Quick View" of departmental health.
- **Approvals Management:** Streamlined workflows for Overtime and Leave requests.
- **Attendance Tracking:** Management of employee attendance logs and approval of manual entries.
- **Employee Directory:** Centralized list of all personnel assigned to a specific department.
- **Schedule Management:** Comprehensive view of company-wide and individual employee schedules.
- **Departmental Notifications:** Targeted alerts and announcements for specific departments.
- **Department Administration:** Full CRUD (Create, Read, Update, Delete) capabilities, including the ability to assign Department Heads and staff.

Advanced Search & Filtering

- **Unified Search Navigation:** A global search bar for quick access across the platform.
- **Employee-Specific Filtering:** Drill down into data based on individual employee profiles.

Initial Setup Wizard

- **System Initialization:** Automated guided setup for first-time runs.
- **Super Admin Configuration:** Secure creation of the primary administrative account.
- **Organization Onboarding:** Guided flow for setting up the initial company profile.

Company Management

- **Company Creation:** Add new legal entities or branches to the system.
- **Dynamic Cleanup:** Delete unconfigured or incomplete company profiles to maintain data integrity.

Activity Log (Audit Trail)

- **Real-time Monitoring:** Live trail of all actions performed within a company account.
- **Smart Filtering:** Sort logs by specific actions or custom date ranges.
- **Performer Search:** Quickly identify which user performed a specific action.

System Preferences

- **Visual Personalization: (original)**
 - **Theming:** Custom Primary colors, font selections, and Dark/Light mode toggle.
 - **Layout:** Customizable drawer (sidebar) navigation styles.
 - **Toast Position:** customize the toast notification (additional)
- **Localization & Regional Settings: (additional)**
 - **Financials:** Customizable currency symbols and formatting.
 - **Time & Date:** Configurable system timezones and date formats.
 - **Multilingual Support:** Support for **12 languages** across headers, descriptions, and menu items.

I've completed the latest set of features, which includes the **Department Module** and several system enhancements (Setup Wizard, Advanced Filters, and Activity Logs).

Based on our previous contract pattern (where 2 modules equaled **25,000**), this new module and the additional features represent a **25%** increase in scope. Therefore, I'll be expecting to add **12,500** to the current billing.

Quick Notes:

- **Included:** Department Module, Setup Wizard, Multi-language support, and System Preferences.
- **Not Included:** Piece-rate Task Management and 13th Month/Bonuses (These are currently in backend development and will be treated as a separate module once fully implemented.).

I have put a lot of effort into ensuring these features are seamlessly integrated and production-ready. Given the additional workload, I believe this billing adjustment is fair and reflects the value added to the system.

Please let me know if you have any questions!
